

Phishing Detection System URL Analyser - User Guide

This document explains how to use the Phishing Detection System URL Analyser.

Step 1: Open the Application

Launch the URL Analyser website in your browser.

Step 2: Paste a URL

Copy the URL you want to test and paste it into the URL input field.

Step 3: Click 'Scan URL'

Press the Scan URL button to start analysis.

Step 4: Review the Result

The system will display whether the URL appears safe or potentially harmful.

Checks Performed

- HTTPS validation
- Suspicious keywords
- IP address detection
- @ symbol detection
- Long URL analysis
